RFID: The future in supply chain

Do you want to know about the next big thing in management that will revolutionise supply chain?

RFID – Radio Frequency Identification – is the new technology that can substantially improve internal and external supply chain operations.

Samuel Fosso Wamba, from the UOW School of Information Systems & Technology, is an expert in RFID.

Samuel is coming to speak with Shoalhaven business people about the adoption of RFID in various industries. He will also present a case for introducing RFID, and will illustrate with case studies.

Make sure you are up to date in the latest technology.

This meeting is being hosted by the Australasian Occupational Science Centre (AOSC) and the Shoalhaven Business Chamber.

Venue: Ray Cleary Building, Shoalhaven Campus
George Evans Rd, West Nowra
Lecture Theatre, UG03
Time: 5.30 – 7.00pm
Cost: Gold coin donation

Light refreshments provided
